Gray space is the extension, transition, or conversion interval of space. It is a fuzzy space and a fun space. It handles and creates a purple atmosphere like mountains, and opens the space for space ... At the same time, it is unpretentious and natural. Dazzling art and fashion, static and steady, outline with the extreme straight and curved, fine-grained, using the perfect structure between points and lines, all things are unified, affectionate, the refreshing and tenderness at this moment comes from the care .
